**DETAILED ACTION*****Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose a method for hydroprocessing a hydrocarbon feedstock which employs multiple hydroprocessing zones within a single reaction loop, each zone having one or more catalyst beds, comprising the step of passing an effluent from a hydroprocessing zone to a separator wherein the effluent is contacted with a hot, hydrogen-rich stripping gas to produce a vapor stream and a liquid stream; passing that vapor stream, after cooling and partial condensation, to a hot hydrogen stripper containing at least one bed of hydrotreating catalyst, where it is contacted countercurrently with hydrogen, while the liquid stream is passed to fractionation; passing the overhead vapor stream from the hot hydrogen stripper/reactor to a cold high pressure separator; and passing a liquid stream from the hot hydrogen/stripper reactor to a second hydroprocessing zone.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
